

DANTE NETWORK

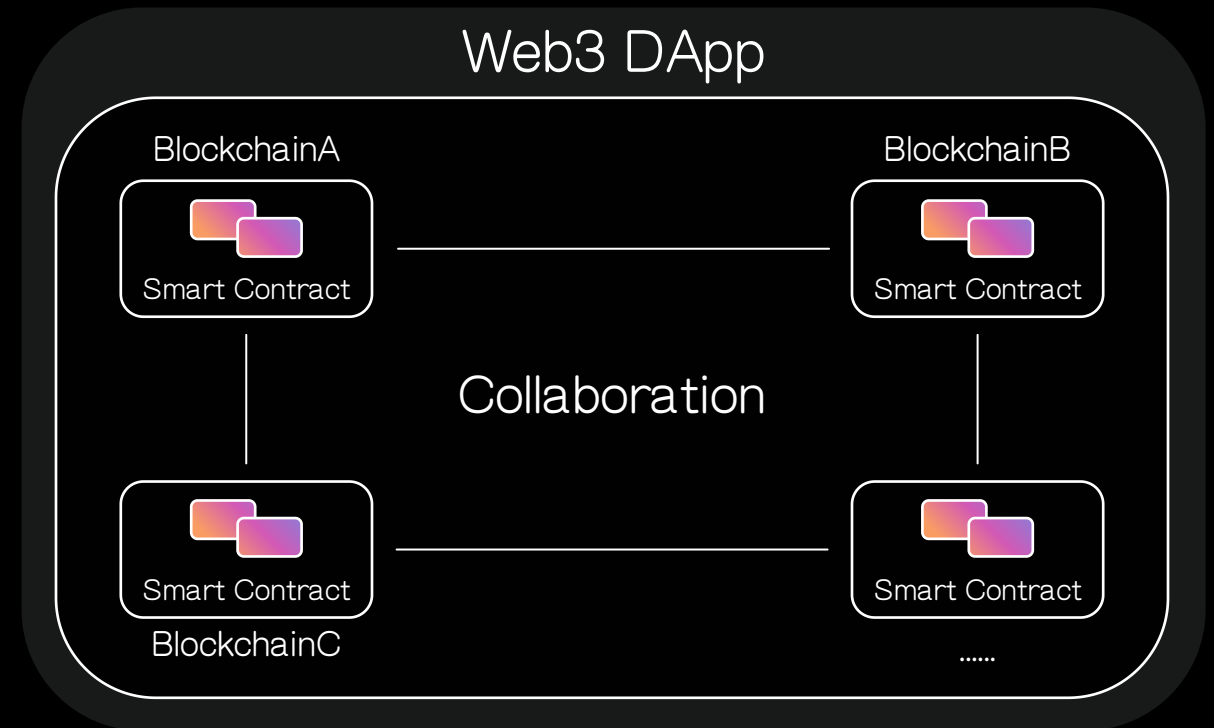

Interoperate and Interconnect

A middleware to empower multiple ecosystem interoperate and interconnect in Web3

In Dante Network, We defines and offers a general protocol stack to realize the interoperability and interconnection.

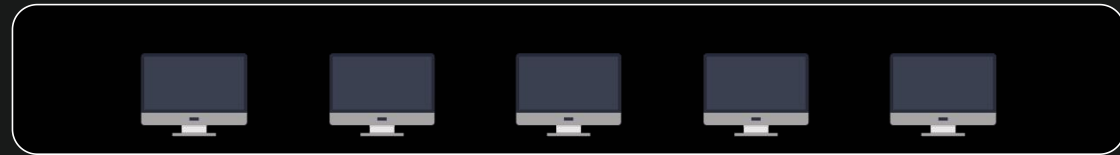

This will bring innovative experiences in web3, just as Internet Protocol is for today's Internet.

From a Computer to the Internet

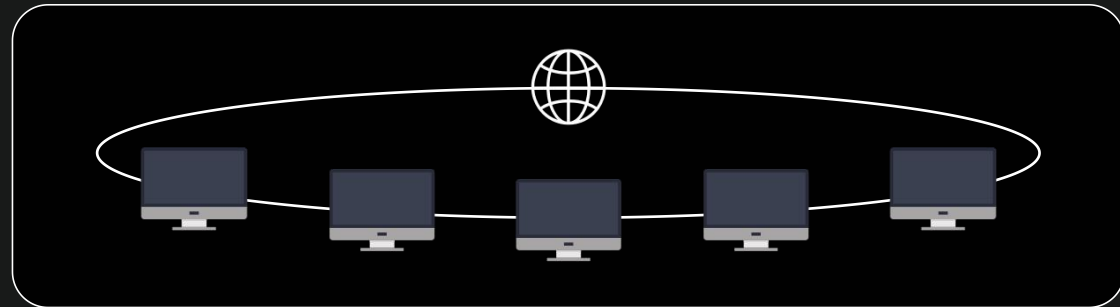

BEFORE

Stand-alone or Lans

AFTER

Global Internet

From Blockchain to Web3

Ethereum -- World' s computer

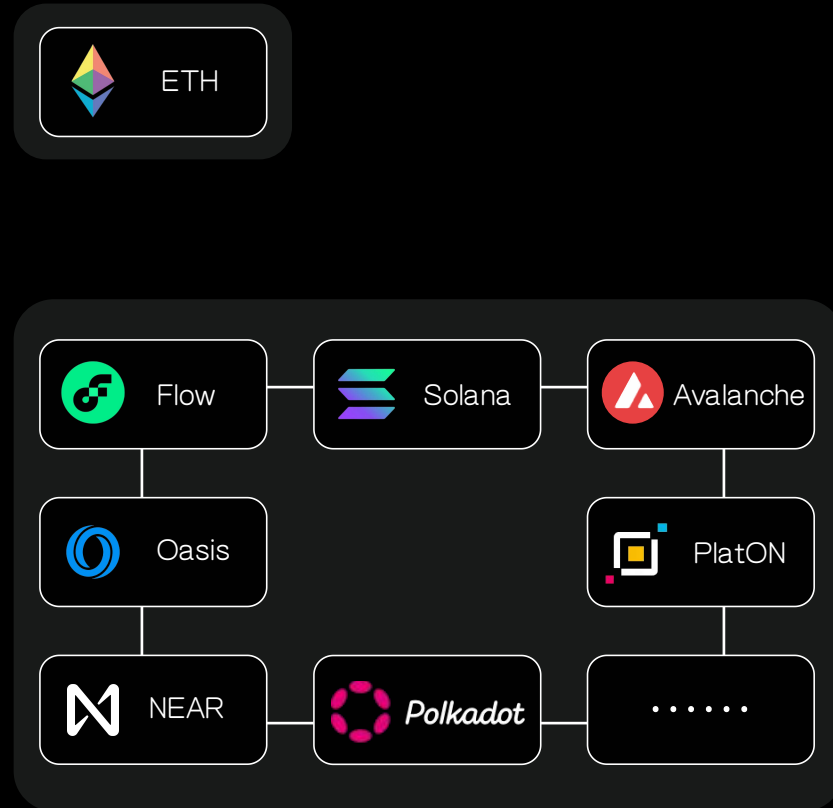

Web3 contains more than one computer

- Limited connection: e.g. Rainbow bridge on Near to connect ETH
- Connection like Lanes: e.g. Polkadot and Cosmos Ecosystem

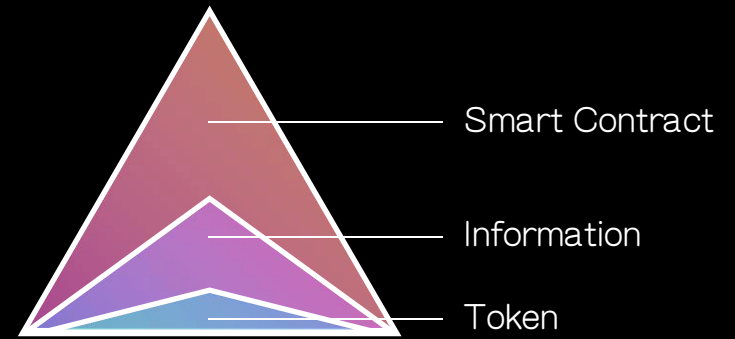

Web3 needs more comprehensive connections like today' s Internet

Unique Features of Dante Network

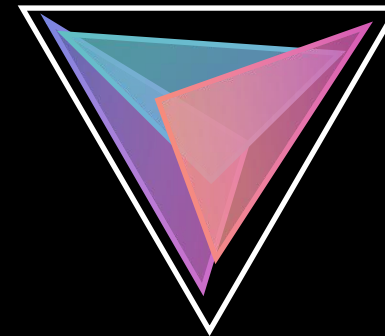

“Internet” of Web3

Complete interoperability

Security Scalability

Decentralized

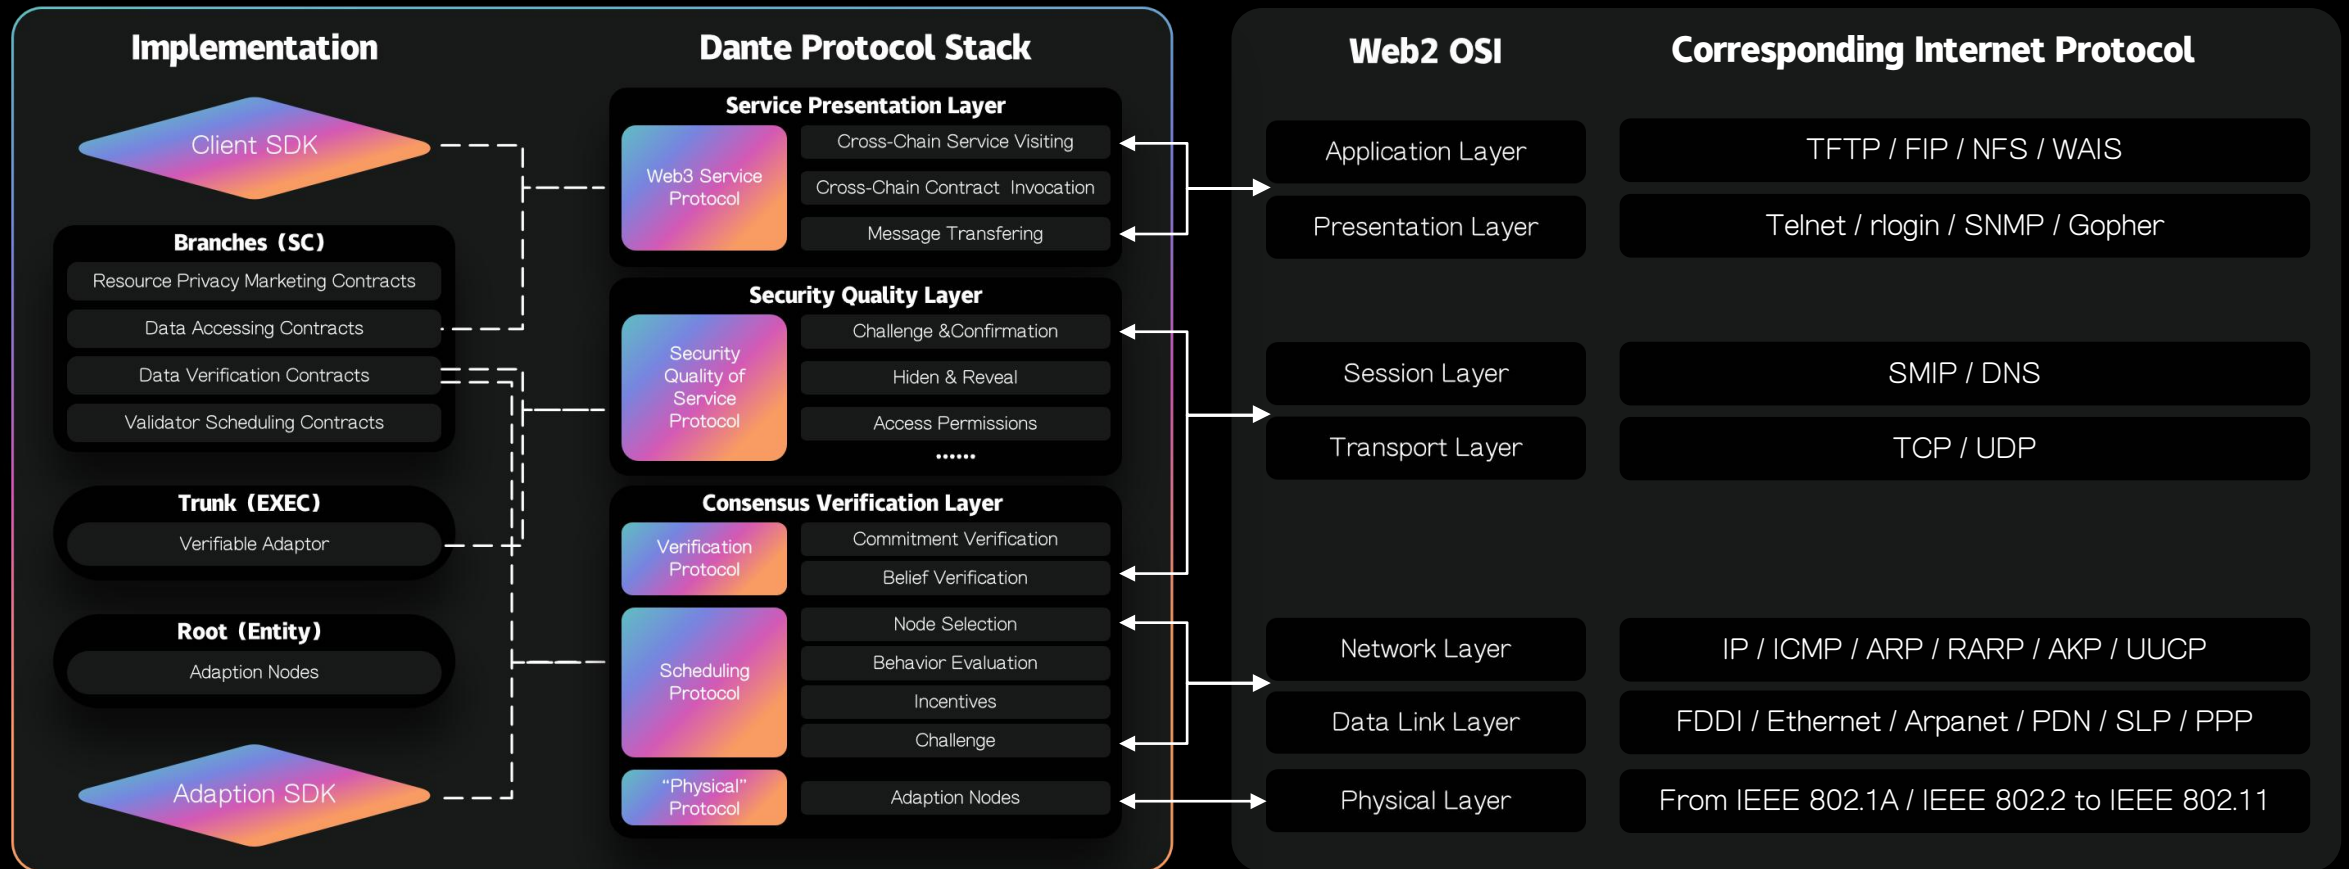

Customized to multiple scenarios
